### KEY WORDS:

Potential, spiritual potential, national-historical values, moral image, social activity, position, active position, social life, faith.

The state should pursue a specific spiritual policy to enhance the spiritual potential of members of society, especially young people. The activities of young people who are spiritually advanced, regardless of their field, ensure their activity in the economic sphere. The activity of young people in the spiritual sphere, any of their initiatives in this sphere that serve the development of society, should be supported by the state and society and subordinated and directed to the interests of the development of our country. It is appropriate that the state's policy should not be limited only to the economic sphere and economic development, but should also be aimed at improving the factors that ensure the development of the spiritual sphere.

“ One of the most important directions of the state's spiritual policy should be related to the preservation, enhancement and management of the spiritual potential of society. Spiritual potential variety social groups and institutes effort developed as well goes on . However this of the process state by coordination and management spiritual potential development strategic content lucky it will social progress goals and objectives with harmonizes . Because exactly state institute spiritual of the environment health in providing , society members cultural level elevate on the way , national the idea in development , the creator and creativity in support of science , literature and art development in acceleration , spiritual inheritance save to protect and future for generations in conveying , spiritual security in strengthening powerful to opportunities has . This of opportunities state spiritual policy by means of rational realization social progress accelerates their absorption and progress pace slows down .”

Spiritual authority save just to stay not , it promotion too important problem is considered . Spiritual authority to raise impact provider one row factors there is is , their every one is also spiritual development , youth spiritual authority to raise impact These factors of the following consists of :

- spiritual environment ;
- spiritual relationship ;
- spiritual needs ;
- spiritual values .

Latest at times all in societies national security main from problems to one is rotating . National security what provision problem only economic progress only with related Of course , economic progress national security

provider important factor . But national security problem many in terms of national spirituality and his/her rise with related . National spirituality of the nation ethnostatus determinant and his/her axiological point of view from the point of view viability provider and his/her cultural national wealth values future for generations delivery to give through the nation 's history in the news viability save remaining important factor task It will pass .

In Uzbekistan national authority not only preservation and to the surface to release , maybe him/her further promotion and targeted realization to do with related was task to perform necessary . This point of view from the point of view researcher S. Jabborova to the mind according to state by following task to perform provision necessary : “ In Uzbekistan society development today's in the phase nation spiritual potential preservation and promotion for the most first of all to him/her danger putting factors impact to be neutralized necessary . Consequently , the state spiritual potential preservation and to raise directed of the policy main tasks this to factors proportional to be need ”.

Current globalization and integration processes as a result of innovations development of our time important to the feature became . Such under the circumstances Uzbekistan society huge international economic-cultural in space himself ability to demonstrate and developed countries in line Join us , our people for worthy to live conditions creation , of the people marriage level rise of youth this In the homeland residence to do and activity take to go for attractive to live to the possibilities has to be strategic task is considered . Such task done in increasing of the youth active position and authority right redirect Uzbekistan society in front of solution waiting current from problems is one .

Saying necessarily , before school education and supreme education system to the youth knowledge to give based on them various profession to the craft has to be , intellectual of authority growth to provide through in the future them good work to their places has in being important factor is considered . The youth work with provision in our country unemployment to reduce big impact This point of view from the point of view following statistic information to bring appropriate will be . In the last 8 years preschool education coverage from 27 percent to 74 percent , higher education coverage from 9 percent to 38 percent increased , new schools built , an additional 800 thousand student place created , in the next 3-4 years preschool education coverage at least 80 percent delivery , from 2025 starting public-private partnership based on every 100 per year new schools to work unloading plan that was done in consideration if we get it , in our country this about affairs really new to the stage coming out confession to grow possible .

Uzbekistan President Sh.M. Mirziyoyev initiatives based on first of all , neighbor countries , Central Asia countries and of the world other countries with every one-sided economic , political , cultural , educational policy done being increased and they with various projects done increase beginning such as processes our country international on the field economic and investment attractiveness These processes are increasing . our country population and especially young people for big opportunities is creating . This opportunities country of the youth various in the fields today's and promising activity on the road to put , their authority to the surface release and realization to do regarding huge factor become is considered . Such factor intellectual of the youth other to countries gone It is also known that at the level prevent takes .

Uzbekistan President Sh. Mirziyoyev As noted , the youth work with in providing their economic independence achievements and in life own their places found on arrival small business and entrepreneurship soxasineing development the most main factor and source become service does . This with together , the economy liberalization under the circumstances entrepreneurship development , its legal-normative the basics to strengthen aimed at economic reforms current from issues one is considered ”.

Philosophical point of view from the point of view when viewed , economic competence system to the development his/her important elements : economic thinking , economic consciousness , economic culture , entrepreneurship culture etc. impact shows . Therefore according to this to events relevant theoretical issues as well analysis to grow demand is being done .

Youth economic his/her thinking develop problem their economic consciousness , in society economic to relationships how much weight with related Analyze the problems as well. to reach demand will reach . Economic thinking the most general in a way in society formed economic relationships his/her members in mind , especially youth in mind reflection to be able in the style of understanding possible . This with together

economic thought society social of mind forms ( economic , political , cultural , scientific , religious , moral , aesthetic) and others ) one Youth economic of thought development their in society occupying standing place and role , activity and community to life showing the impact understanding This point of view is possible . from the point of view of the youth economic his/her thinking develop their economic authority progressive to continue means .

Spiritual competence human of authority important shape is , it is a person inseparable attribute , property . In this sense spiritual competence human essence organization will reach . In Uzbekistan always spirituality field and his/her to the development big attention Our country is focused on centuries during formed culture , spirituality , moral values our people to his blood , to his life and marriage in style absorbed gone . Especially since independence then this field economy and politics with one in line our country priority direction as Uzbekistan First President Islam Karimov spirituality field economy with equal strategic importance ownership confession reached He was a people spirituality strength and development In Uzbekistan state and society important from the duties one as confession reached was . Later Islam Karimov " High" spirituality – invincible in the work " power " society spiritual field , national spirituality , spiritual update and spirituality to the development big attention focused was .
