Introduction

On activities this we have To do analysis situation or observation at SDN 10 Kota Barat. Analysis condition physique from SDN 10 Kota Barat schools are divided be 2 floors that is 1st floor and 2nd floor , floor first there is a number of room study that is room class 1,2,3,4 and with them with operator's room , teacher's room and room head school . Floor secondly , there is room grade 5 and grade 6 as well there is a number of room other . Next we observe condition potency students , by whole ability academic very good students . Potency student developed in accordance with talents and abilities , both from facet academic and non- academic . Talent nor passion student channeled through activities extracurricular .

Ridwan Halim (2008:4) defines not quite enough answer law as something consequence more carry on from implementation role , fine role that is rights and obligations or power . kindly general not quite enough answer law interpreted as obligation for To do something or behave according to method certain no deviate from regulations that have there .

Thomson Dan Perry, work same is something activities that have different levels _ start from exists coordination and cooperation until occur inside collaboration _ something activity work same . On the other hand Rosen put forward that work same is very efficient resource for quality service . In Thing this work same in realm economics in the field sell buy .

Work same between family or institution education Becomes factor important in development character son , so child can grow develop with good character . _ environment education will impact to interest study student . So environment good education _ could develop ability and development student in the learning process

We apply title collage made from dry on our projects , as we are well aware that child child at age early certain have soul each other 's creativity where with collage made from dry this they start manage or utilise natural like leaf purpose dry _ increase score work same they in a manufacturing process collage made from leaf dry the . We take class 3A deep our activities for in work same as well as participate in our project regarding collage made from leaf dry that collage made from leaf dry is works made _ with creative because use material that can got from environment around like leaf dry .

Method

The activity method used is direct observation, project activities are carried out by going down to field direct for made observations at SDN 10 Kota Barat. In class 3A we carry it out observation as well direct recording of project activities that we work on and the response of the students during the activity was very good that is they could work same in manufacture project this and them active in gift material and discussion on activities this.

Results And Discussion

Results

collage project activities this produce a collage of from natural or leaf dry useful to know how much his creativity participant educate . Process of implementing collage project activities from leaf dry also can Becomes something creation participant teach later _ that will decorate a room class them to be seen more effective .

Figure 1. Products project collage

Discussion

We carry out activity project this in 3 days time . on the day first specifically day wednesday , we do introduction to each class in SDN 10 city west and before that our meet with head school and also the teachers in the school the . We were directed to room for talk about as well as introduce activity project what are we will do . Before it , we first of all invited around a number of class and acquaintances with students _ nor guardian class them .

The second day , we started work project and we choose class 3A as class to be made object research . Initially , we invited students for share group into 4 groups . Then, we introduce and explain our project , after that's what we invite they for gather ingredient main from project the that is leaf dry all around _ _ environment school . And after that, we invite they for scissor foliage the Becomes a number of part small and stick it on the sketch the animals we have prepared . And no forget about each results profession them we paste print finger they through watercolor as sign results workmanship project they has done .

on the day third , we play games and give away present to the participants educate , as saying accept love because has follow participate in activity our project .

At the beginning of the work process project this there is a number of barriers , that is there is a number of decent kid _ difficult arranged , some are still quarrel between fellow , and some are super active , so we have to Secrete extra power for arrange a number of child such , will but after invited for work project this , a few from they interested and listening instruction from us. During , work project this , we do n't unceasingly emphasizes a sense of responsibility and work same to the participants learn , and the results we can see from method they complete each part in processing project , and also each other work same .

Activity project this is one _ method effective in embed score work same to participant educate , besides it also builds a sense of responsibility and develops creativity student .

Collage made from leaf dry is works made _ with creative because use material that can got from environment around like leaf dry .

Conclusion

After we discussed it turns out project this effective for improve the sense of work same between participant educational and effective in build creativity students , p this also improves awareness will score responsible for the participants educate .

Suggestion

1. For The place Study

Need conducted approach counseling to students who are lacking can arranged for them can understand draft from learning especially in the sense of responsibility and work same . with exists gift learning this , will make it easy student understand a number of must rule _ followed .

2. For Researcher next

Could To do study next with develop study this and use more material _ sufficient for students could increase creativity and especially on values cooperation and sense of responsibility them .

Acknowledgment

We realized that without help and guidance from various party , enough difficult for us to complete study this . because _ that's what we say accept love to Prof. Dr. Abdul Rahmat , S.Sos ,I ., M.Pd , As lecturer support eye studying Introduction to Gorontalo State University Orchid Education : <https://orcid.org/0000-0002-1681-4450> and the Elementary School Teacher Education Study Program that accommodates researcher in finish project eye studying Introduction to Education.
