**KEY WORDS:** On the organization of the activities of the Ministry of Support of Mahalla and the older generation, the concept of implementation of the principle of prosperous and safe proximity to 2020-2024, the Mahalla-the sector-the folk technique-the Mahalla, “crime should not occur in my mahalla”, “mahallabay”.

### Introduction

Today, the issue of preserving the peace, and national and spiritual values of people in the world is growing in various regions of the world and the development of national and spiritual values for future generations is becoming increasingly important. The peace of the peoples mentioned above first, for the rest of the peaceful self-government bodies, starting the peace of our country, starting from the peace of our homeland and families.

After all, the phrase I heard from the country is not in vain. This confirms that this administration's role and prestige as an independent institution in ensuring the peace of society is increasingly important. President of the country"... Today, the mahalla must appear as a large social force. Because activists, the elders who have seen a lot, our experienced brightness claimed to solve any problem with the public [1] From these opinions of our President, this structure may indicate how high the role in society is. Decree of the President of the Republic of Uzbekistan No. PF-6 28 PF-60 on the Development Strate of 2022-2026, March 1, 20022 "Family and Women" on March 1, 2022 Decalions of PF-81 Decrees "Security Neighbourhood" within the tasks set out in the tasks established by girls, work with girls 'Rin occupies. In particular, the development of the content

of the society, neighbourhood and families, to develop modern mechanisms and modern mechanisms for it and 2020-2024 The definition of intended measures is through the neighbourhoods in the neighbourhoods, to improve the socio-spiritual environment. The comparative-critical study, analysis, methods, methods of critics, socio, psychological, and pedagogical literature on the problem.

From the first days of the independent development of our country, great attention is paid to increasing the role and importance of citizens' self-government bodies in the life of our society. Including; In 1992, the Republican Charitable Foundation "Mahalla" was established [2], in particular, in recent years 38 laws and regulations on the community institution were adopted, and more than 50 were improved. The monthly salary of the chairmen and secreters of the citizens' assemblies increased by 1.5 times last year. Over the past three years, 624 mahallas were rebuilt, and 2,665 were reconstructed and repaired. In 102 District and City Center, the "Mahalla Center" complexes have been built. In the training session of each citizen, the "Captainary Construction" in more than 4,000 mahalla buildings [3] can be bright evidence of the infinite level of support of the neighbourhoods. The ministry is great to ensure peace and tranquillity in our country, and the peaceful work of our people. Of course, measures aimed at combating crime cannot be said in the level of demand in all mahallas. For example, in 1994, 1, 5005 crimes were committed between 25-29 years old 1994, while in 1999 reached 13038. More than 9.5 thousand registered crimes were committed by women. In 2003, unorganized, severe, and 2,6579 crimes were committed by untreated, jobs and young people. By 2017, the mahallas were about 200 killings compared to each other because of family disagreements in the neighbourhoods. One of the important innovations in the system was established in all mahallas in all mahallas in all mahallas<sup>81</sup>. At the end of 2019, crime performances in the country's 1797 citizens' assembly were relatively in Samarkand (16.6%), Fergana (13.5 %), Namangan (10.9%) and Tashkent (10.3%) regions. The chairman of the citizens was given a number of additional rights. In particular, the Chairwoman of the Karakalpak Interior Ministry for the assessment of the activities of the Citizens' Assistance Inspector, the head of the regional medical affairs and the mahalla, which is mandatory to be considered, and the chairman of the mahalla, which has eliminated cases between the prevention inspector, and the Prevention Inspector, has been eliminated to the Prevention Inspector, as well as the departments We need to emphasize that it is important in doing. Also; It is necessary to establish uninterrupted, systematic cooperation with law enforcement agencies, other government agencies and public organizations on the Mahalla Institute's "Sevely Mahalla".

We emphasize the mechanisms for mahalla bay cooperation at the "Safe Mahalla" principle; First, the head of the sector sees a measure to solve each age's issue; Second, the prevention inspector shall be considered to be preventable individually; Third, the Chairman of the MFY will be aware of the situation of families that are prone to every troubled family and crime; People's Deputies will consider at the district and city council of People's Deputies, to ensure the peace and peace of mahallas, such as the principle of the expiration of young people in the youth Agency, the "Yetoni-five Coaches". President of the Republic of Uzbekistan Sh. Mirziyoyev signed a decree on February 3, 2017, on the "Mahalla Institute for Improvement." This Decree has launched a new stage in further development of the activities of the Namora Institute [4]. The future of our President will also take additional measures to increase and strengthen the material and technical base of staff and further increase their location and position in the life of our society. The important thing is important in this case, [5] Today, work is being done effectively as the backbone of the self-government system in the neighbourhood. In other words, glorifying the social activity of citizens, increasing the social activity of citizens, strengthening the social activity of the citizens, is to increase the social activity of citizens, strengthen the social activity of citizens, strengthen the social activity of citizens, strengthen the people of the families, strengthen the social activity of citizens, strengthen the people of the family, to increase the social activity of citizens, strengthen the social activity of citizens, strengthen the social activity of the citizens, strengthen the social activity of citizens.

### Suggestions

According to the above, it is possible to say that the principles of the "Safe Mahallada" are given the following suggestions:

- Establish spiritual activities under the serious risks in the world, the field of geological threats, "There should be no crime in the mahalla";

- In terms of the importance of the Public structure "Mahalla Posbband" in the neighbourhood, it is expedient to hold this structure;
- Separation of red, yellow, and green spheres by regime indicators of regional mahallas
- Placement of banners aimed at combating crime and awareness in the neighbourhoods;
- Increase the number of administrative offences to ensure the development of an influential system in the neighbourhood;
- Study and systematic analysis of living conditions of families in the neighbourhoods;
- Getting different guns in the neighbourhoods (Billiaris, Tire, Tire, Tire, Tires, Games) is expected to take over the service period and strengthen the liability for the service period;
