ABSTRACT

In the process of forming a moral and ethical culture in students of military education, the national ideology, based on the national idea, founded by the President of the Republic of Uzbekistan, has served as a guideline. Islam Karimov recalls that "in the process of forming an ideology, first of all, the progressive worldview, the mentality of this part of the society, which sees its destiny as separate from the destiny of the Motherland, is taking place in the life of the country today. We wholeheartedly support the process and fight for its future. "

In the process of forming a moral and ethical culture in students of military education, the national ideology, based on the national idea founded by the President of the Republic of Uzbekistan, served as the main guideline. Islam Karimov recalls that "in the process of forming an ideology, first of all, the progressive worldview, the mentality of this part of the society, which sees its destiny as separate from the destiny of the Motherland, is present in the life of the country today. "We wholeheartedly support the ongoing process and fight for its future."

Then, - said the President, - "it is necessary to study in detail the views and philosophies of the ideological views of scientists who have made an invaluable contribution to our national history and universal development, the progressive development of society." , Beruni, Ibn Sino, Ahmad Yassavi, Alisher Navoi and others. implied his works.

In this regard, to change the minds of readers, to form a person who thinks freely, fully demonstrates and realizes his inner potential, characteristics and talents - "for the benefit of the people and the country." considers it necessary to change the structure of education and upbringing. Islam Karimov reminds that only those who are free from various "isms", have general and special knowledge, the ability to think, and understand the need to harmonize national and universal values, will be able to build the foundations of civil society. z will be able to contribute ". The national idea, the state ideology is the conceptual basis of our research.

The main conceptual methodological and theoretical approaches to the study of the problem are:

- The training of students with a high level of professional ethics (universal and military-professional culture) with a priority of moral culture;

- Moral and ethical culture (determination of the place, role and essence of moral, general, military culture in the environment of the military-cultural personality model);
- Conduct research under the motto of the basic principles of national ideology, in the context of public education policy, taking into account new areas of education;
 - on the basis of the supremacy of universal and national values, first of all, national, spiritual-moral and historical-ethical values, structural, step-by-step, complex, structural-meaningful interdisciplinary approach;
 - effective use of specific features and opportunities of extracurricular activities;
- Moral culture, which is an important basis of professional culture, its main component - moral and ethical culture, based on the formation of the moral and ethical culture of modern youth and the moral and ethical culture of students and servicemen.

Research based on: original program of extracurricular activities, new pedagogical approaches, optimal technologies, effective forms, innovative methods, pedagogically effective methods and tools;

- Integration of students' emerging moral and ethical knowledge, concepts, ideas, qualities, attributes, characteristics and abilities - communication, behavior, actions, work and activity (unity of knowledge, consciousness, practice) into real practice to mean;
- Special attention is paid to the high moral and ethical qualities and qualities of students of military education, his moral and ethical image, pedagogical training in targeted educational work with military trainers in academic lyceums and professional colleges ;
- focuses on the development of not only the professional culture of military students, but also their personality as a citizen, officer, military education teacher.

The successful solution of the problem depends on the professional culture, especially of the modern officer h
