Shavkat Mirziyoev attaches great importance to youth education and made several important points in this regard. According to him, the education of the young generation is one of the most important tasks of society, and future development depends on how well this education is organized. Education based on national and universal values. The President stressed that it is necessary to develop in them a spirit of respect for national values and traditions in order to educate young people to be patriotic, hardworking and good-willed people. He said: "Our youth should be enlightened, mentally and physically healthy and faithful to national and universal values." The most important factor is family and school education. Mirziyoev emphasizes that the role of family and school in youth education is incomparable. According to him, a child's upbringing is initially carried out in the family, and the school strengthens and directs this upbringing. Accordingly, the role of teachers in society is also very important. Smart, educated and enterprising young people are the backbone of the country. In the words of the President: "The more educated and enterprising our young people are, the faster our country will develop." Protecting young people from bad habits. The President always emphasizes the need to protect young people from various harmful habits, moral corruption and the influence of foreign ideas. In his opinion, this task is not only the responsibility of the state, but also of parents and society. The role of spirituality and culture in youth education. Mirziyoyev places great emphasis on the spiritual maturity of young people, emphasizing the need to increase their reading skills and encourage them to engage in arts and sports. He says: "Promoting the spirituality of young people is one of the most important tasks. For this, it is necessary to introduce them to reading books, art and culture." In general, Shavkat Mirziyoev's thoughts on youth education are aimed at forming young people into patriotic, educated, enlightened and selfless people. On his initiative, many state programs for youth education are implemented. In the address of the President of the Republic of Uzbekistan Shavkat Mirziyoyev on October 1, 2020 at the solemn ceremony of the Day of Teachers and Instructors, he congratulated distinguished teachers and teachers, valuable educators, enthusiastic intellectuals, professors and teachers with a professional holiday. Furthermore: "We have set ourselves the main goal of creating the basis for a new Renaissance, that is, the Third Renaissance, in Uzbekistan through large-scale democratic changes, including educational reforms." When we talk about this, first of all, each of us, our entire society, should deeply understand the essence of the Third Renaissance." His appeal motivates every professor-teacher, researcher and researcher, future young scientists, master's students,

to create and create innovative research. If we look at the history of Central Asia, our country, our motherland, has always been a center of highly developed research, civilization and culture. The worldwide scientific and creative discoveries of our ancestors, the great thinkers Muhammad Khorezmi, Ahmed Farghani, Abu Rayhon Beruni, Abu Ali ibn Sino, Mahmud Zamakhshari, our grandfather Amir Temur, Kozizada Rumi, Mirza Ulugbek, Giyaziddin Koshi, Ali Kushchi, outstanding scientists like Lutfi, Sakkoki, Hafiz Khorezmi, classical poets and thinkers like Abdurahman Jami, Alisher Navoi, Bobur Mirzo, historians like Sharafuddin Ali Yazdi, Mirkhand, Khondamir, painters like Mahmud Muzahib, Kamoliddin Behzod, many calligraphers and musicians, musicologists and architects as well as rare manuscripts and works are due to the three thousand year existence of deep roots in our history and this greatness in our veins. indicates that the blood of our ancestors flows. Therefore, it is necessary for young artists, teachers, professors, master's students, researchers and researchers to study the unique and unique scientific and spiritual heritage of our great ancestors, draw strength and inspiration from their immortal heritage, and publicize and implement the results of their research in the scientific field, as well as the creative works of their educational experiences and the innovative ideas they created. As the President of the Republic of Uzbekistan Sh. Miziyoiev said: "If we strive, if we work hard, we can achieve any high goal."
